DETAILED ACTION

This action is in response to papers filed on September 9, 2006.

No claims have been amended.

Claims 1-31 are pending.

Claims 1-31 are rejected.

The rejections made in papers mailed April 18, 2006 have been withdrawn and a new basis of rejections have been set forth below.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-7, 9-20, 22-27 and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by US 20020032659 A1 Waters; System and Method for Obtaining and Developing Technology for Market
2. As to claims 1, 11, 22, 29 and 31 Waters teaches:
Receiving information regarding inventive ideas(Pg. 3 ¶ 6).
Categorizing the information by industry(Pg. 3 ¶ 20).
Evaluating invention potential(Pg. 3 ¶ 19).
Providing database of information to potential costumers of inventions(Pg. 3 ¶ 19).
3. As to claims 2, 12 and 23 Waters teaches the evaluation as prior art searches (Pg. 3 ¶ 19).

4. As to claims 3, 13 and 26 Waters teaches the computer processing controlling the interactions between users(Pg. 3 ¶18).
5. As to claims 4, 15 and 24 Waters being possibilities for funding(Pg. 5 ¶31).
6. As to claims 9 and 17 Waters teaches indicating current patent art pertaining to invention(Pg. 4 ¶24).
7. As to claims 10 and 18 Waters teaches controlling access to the customers(Pg. 5 ¶30).
8. As to claims 7, 20 and 27 Waters teaches paying inventor royalties(Pg. 5 ¶30).
9. As to claim 14 Waters teaches anonymity between users(Pg. 3 ¶17).
10. As to claim 16 Waters teaches refining invention after initial evaluation(Pg. 4 ¶21).
11. As to claim 25 Waters teaches experts(humans) reviewing inventions(Pg. 3 ¶19). The examiner notes that this limitation, although taught by the prior art, is considered intended use. By having a human perform functions of the process is merely how applicant intends to use the process.
12. As to claim 30 Waters teaches a company running the databases.(Pg. 4 ¶ 26).

Claim Rejections - 35 USC § 103

13. Claims 8, 21 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 20020032659 A1 Waters as applied to claims 1-7, 9-20, 22-27 and 29-31.
14. As to claims 8, 21 and 28 Waters teaches a information disclosure process and disclosure review. However, Waters fails to teach translating information into the

desired languages. It would have been obvious to one of skill in the art at the time of invention to combine this limitation with Waters so as to not limit the type or nationality of costumers who may be interested in funding an invention.

Response to Arguments

15. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 7043454 Powell; Method and Apparatus for Cryptographically Assisted Commercial Network System Designed to Facilitate Idea Submission, Purchase and Licensing and Innovation Transfer.
